1891.

NOTICE.

To avoid inconvenience in the payment of monthly salaries, it will be observed that in these tables the computations have been varied in the monthly division of the quarters to conform as nearly as was practicable to even tenths of dollars.

That part of the table should only be used in paying salaries by the month; any annual salary paid for a less period than one month should be computed from the per diem column of the proper quarter.

To illustrate this: Suppose a salary of \$1,800 per annum is to be paid for the month of June (30 days). This will be found in the first column, on page 67, and is \$148.30. Suppose, however, the payment is to be made for the month of May (31 days) and 29 days in June. In the first column May is \$153.40, and in the column under "Second quarter," 29 days, is \$143.41, or $\$153.40 + \$143.41 = \$296.81$.

\$600 per Annum.

\$150 per Quarter.		First Quarter, 90 Days.		Second Quarter, 91 Days.		Third and Fourth Quarters, 92 Days.
